

SECURITY AWARENESS MANAGEMENT™

An Interactive Management Tool for Current Security Systems & Cameras

Make your systems work for you with SAM, our comprehensive security management solution. SAM will tie into your existing security systems for easy access, management and viewing. SAM is designed to work with what you already have in place making it easy to enhance and improve safety while being easy on the budget.

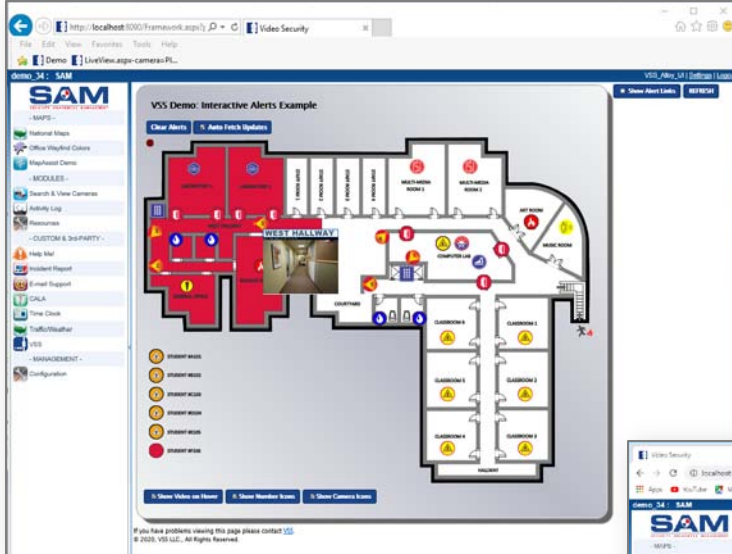

SAM™ PROVIDES:

- Interactive mapping for door locks, intrusion detection, cameras, access control, and other security and environmental sensors that will display areas in alarm and provide click to “live” camera views
- Proactive camera alerts from existing video cameras – when your facility has an alert condition, SAM will push the live feed from the nearest video camera to desktops and mobile devices
- Proactive alerts that include alert data, as well as, display user defined items such as response protocols, site maps, evacuation plans, etc.
- A Management GUI for quick access to other systems you interact with and manage (access control, off-site camera systems, visitor lookups, nurse call, theft detection, etc.)

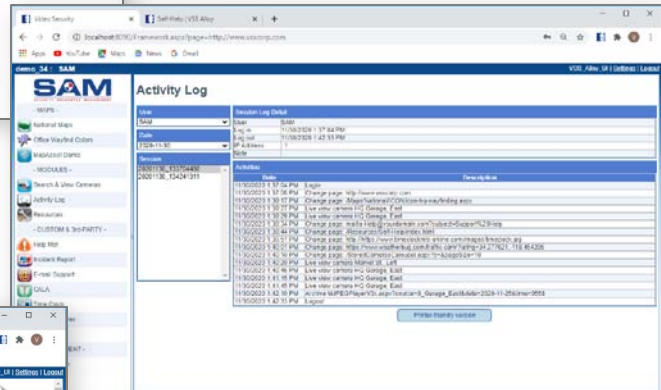

SAM™ PROVIDES (CONTINUED):

- Management tools that log user access to systems and allow post-event evaluation of adherence to response protocols

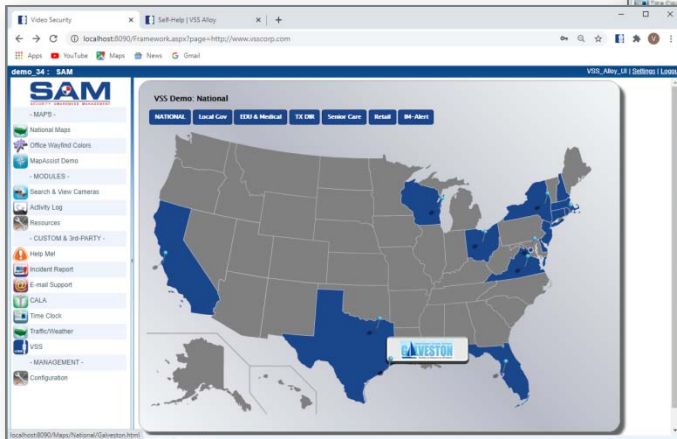

SAM™ Includes VSS MapAssist™:
Interactive Mapping of security devices
with camera hover live view thumbnail

SAM™ includes VSS Alloy™ Navigation:
Include all security systems in one
interface and track usage via Activity Log

**SAM™ includes VSS Alloy™ Scalable
Enterprise Mapping**

SAM™ includes VSS IMAAlert™
providing Video Notification for
all security devices
